Website Accessibility and Privacy Self-Check

Movahedi Solutions, 1000823315 ONTARIO INC., Mississauga, Ontario, Canada
Date: October 28, 2026 | Contact: mohammad@movahedi.ca

This document is a self-assessment, not a certification, audit, or third-party verification.

This document is a self-assessment, presented as a self-check, by 1000823315 ONTARIO INC., operating as Movahedi Solutions. It is not a certification, not an audit, and not a third-party verification. It describes what the public site at movahedi.ca does on privacy, cookies, and accessibility, as verified by text fetch of the live site on October 28, 2026.

Date: October 28, 2026
Company: 1000823315 ONTARIO INC., operating as Movahedi Solutions
Location: Mississauga, Ontario, Canada
Contact: mohammad@movahedi.ca
Public site: https://www.movahedi.ca

1. Status and scope

This self-check covers the public site only. It does not cover a client system, a client site, or a paid product. It states what a visitor can see and use on the public site, with dates and links where the site itself gives them. Where the site text does not state a point, this document does not state it either.

Movahedi Solutions is an independent privacy and AI governance consultancy. Its founder holds, as personal credentials, ISC2 CC, CIPP/C, and Six Sigma Black Belt. Those are personal credentials. They are not company certifications.

2. Public site at a glance

Verified by text fetch on October 28, 2026, at https://www.movahedi.ca:

- The site is a working library for Canadian privacy and AI governance.
- It gives privacy, legal, security, product, and AI teams free tools, plain-language coverage of Law 25 and PIPEDA, and one daily insight in English and Quebec French.
- It lists 21 hands-on tools for breach response, data mapping, consent, AI risk, explainability, and governance.

- It lists a bilingual privacy glossary of 320 terms.
- Its services page states that free tools run entirely in the visitor browser, with no account, no tracking, and no sales call attached for those tools.
- The site is served over HTTPS through Cloudflare, and built and deployed from GitHub.

Services offered by Movahedi Solutions, for reference: AI and agent inventories; EU AI Act readiness assessments; custom AI governance frameworks; risk assessments; privacy advisory; Law 25 compliance support; knowledge-base design and build.

3. Privacy on the public site

What the public site does:

- Publishes a Website Privacy Policy, last updated July 15, 2026.
- Presents privacy and AI governance coverage in plain language, covering consent, access, retention, breach response, vendors, and cross-border data on the privacy side, and use-case discovery, risk classification, explainability, bias, human oversight, acceptable use, and monitoring on the AI governance side.
- Offers a daily insight in English and Quebec French, with the primary source kept close to the analysis.
- Gives a contact point for questions: mohammad@movahedi.ca.

What a visitor can do first: start with a question, then use a tool, check a rule, or read the analysis, without needing to start from a blank page. That route is stated on the homepage itself.

4. Cookies and browser-based tools

What the public site does:

- Most tools run in the visitor browser, so working material stays with the visitor, as stated on the homepage.
- The services page states that free tools run entirely in the visitor browser, with no account, no tracking, and no sales call attached for those tools.
- Tools turn a live question into a file, score, checklist, or decision the visitor can take back to their team. Examples verified on the homepage include the Breach Notification Deadline Calculator, the AI Governance Starter Checklist, The Black Box Files learning game, and the Adverse-Action Notice Generator.
- The Data Mapping Field Guide runs in the visitor browser, and helps a visitor build an inventory, test retention choices, trace a data flow, and export the working file. It covers Quebec Law 25 and

PIPEDA.

This section states the site own statements about its free tools, as verified by text fetch. It does not state a cookie list, a cookie consent platform name, or a tracking measurement, because the fetched site text does not give those points in the pages checked.

5. Accessibility in plain terms

What the public site does, as verified by text fetch:

- Content is written in plain language, with tools, rules, and analysis kept connected, so a visitor can start from a question rather than from a statute or framework name.
- The daily insight is published in English and Quebec French.
- The privacy glossary is bilingual, with 320 terms.
- Tools are grouped by task, such as breach response, data mapping, consent, AI risk, explainability, and governance, so a visitor can pick the tool that matches the question in hand.
- Free tools are offered without an account step for those tools, as stated on the services page, so a visitor can open a tool and use it directly.

This section states only what the fetched site text supports. It does not claim a conformance level, a test result, or a named accessibility standard, because the fetched site text does not give those points in the pages checked.

6. Services and contact points

A visitor who wants advisory help, rather than a free tool, can use the services route on the site. The services page lists privacy and data governance, AI governance, process excellence, custom AI for GRC, media data strategy, and fractional advisory routes, with a short discovery call as the first step stated on that page.

Registrations and third-party listings recorded October 27, 2026: UNGM Basic 1295964; MERX Basic Free; CanadaBuys / SAP Ariba AN11542201146; CPSS ePortal; Ontario Tenders Portal; LinkedIn Services; Catalant; Clutch, https://clutch.co/profile/movahedi, 0 reviews; Trustpilot, https://www.trustpilot.com/review/movahedi.ca, 0 reviews / 0.0.

7. What this document does not claim

This self-check does not claim a company certification, insurance, or clearance. It does not claim a

conformance level, a test result, or a named accessibility standard for the public site. It does not claim a cookie list or a tracking measurement beyond the site own statements in Section 4. It does not cover a client system. A buyer who needs a document for a specific procurement can request it through mohammad@movahedi.ca, and Movahedi Solutions will confirm what it can provide for that procurement.
